Index of Abstracts

Volume 12 (1991)

Abay, Abera. *Extremes of interarrival times under a variety of conditioning*, 438.

Abay Asmerom, Ghidewon. *Graph product and covering graphs* (Preliminary report), 18.

Abbott, Catherine, Bator, Elizabeth M. and **Lewis, Paul.** *Non-compact operators on continuous function spaces*, 114. *Strictly singular and strictly cosingular operators on continuous function spaces*, 114.

Abdalkhani, Javad. *Non-smoothness of solutions of Volterra equations with Abel-type kernels*, 158.

Abdelkader, Mostafa A. *Exact solution of a third-order differential equation of fluid draining*, 291. *Exact Bessel solutions of a second-order nonlinear system*, 321. *Exact solution of a second-order, second degree differential equation*, 390. *Exact solution for a nonautonomous van der Pol-Duffing equation*, 508.

Abell, Martha and **Roberts, Lila.** *A symmetry reduction of the equations for a four-level solid state laser system* (Preliminary report), 96.

Aberbach, Ian M. *Equational constraints and module-finite extension of domains* (Preliminary report), 353.

Abhyankar, Shreeram S. *Wreath products and algebraic fundamental groups*, 455.

Abian, Alexander. *A new derivative for functions*, 285. *Finite differential operators and finite integral operators*, 325. *A simplest definition of ordinal numbers*, 385. *Construction of a basis for finitely generated Abelian groups*, 507. *The inertia of time and the energy spent on moving time forward*, 572.

Abotteen, Essam A. *On the structure of the representation ring of finite classical groups* (Preliminary report), 64.

Acar, Robert and **Gutman, Semian.** *An L-1 equation error method for identifying coefficients of elliptic equations* (Preliminary report), 100.

Acker, Andrew F. *The multilayer fluid problem*, 99.

Adams, Colin C. *Dehn filling hyperbolic 3-manifolds*, 494.

Adams, Colin C. See **Brock, Jeffrey F.**

Adams, David R. *Weakly elliptic systems with obstacle constraints*, 90. *The Winer test for semi-linear elliptic PDE* (Preliminary report), 250.

Adams, M. E., Dziobiak, W., Gould, Matthew and **Schmid, Jürg.** *The lattice of quasivarieties of pseudocomplemented semilattices*, 565.

Adem, Alejandro. *Subgroup complexes and cohomology of sporadic simple groups* (Preliminary report), 219.

Adler, André. *Almost sure limit theorems for normalized sums of random variables*, 227.

Adler, André, Rosalsky, Andrew and **Taylor, Robert L.** *Some strong laws of large numbers for sums of random elements*, 226.

Adler, Irving. *Some properties of numbers revealed on a cylindrical point-lattice*, 341.

Adolphson, Alan C. and **Sperber, Steven.** *Twisted exponential sums and slopes of Frobenius for generalized hypergeometric functions*, 459.

Aftabizadeh, Reza, Aizicovici, Sergiu and **Pavel, Nicolae.** *Anti-periodic solutions to a class of abstract first and second order evolution equations*, 94. *Anti-periodic boundary value problems for higher order differential equations in Hilbert spaces*, 94.

Aggarwal, Alok. *Applications of array searching to economic lot-sized models*, 166.

Agler, Jim. *Hereditary manifolds*, 473.

Agrawal, B. D. *Sets of orthogonal polynomials of discrete variable.* I, 508.

Ahmadi, Mohammad H. *On the conjecture of Erdös-Strauss* (Preliminary report), 32.

Aizicovici, Sergiu. See **Aftabizadeh, Reza.**

Akis, Vladimir N. *Denjoy diffeomorphisms of the torus* (Preliminary report), 376.

Alas, O. T. *On weakly χ_1-collectionwise Hausdorffness*, 313.

Alavi, Yousef, Behzad, Mehdi, Erdös, Paul and **Lick, Don R.** *Double vertex graphs* (Preliminary report), 19.

Alber, Mark S. *Geometric phases and monodromy of singularities*, 556.

Aldaz, Jesus Munarriz. *A general covering lemma for the real line*, 70.

Aldous, David J. and **Brown, Mark.** *Inequalites for rare events in time-reversible Markov chains*, 542.

Aleksandrov, Lyudmil. *A separator theorem for graphs of bounded genus*, 531.

Alexander, H. *Ends of varieties* (Preliminary report), 246.

Alexander, Kenneth S. *Finite clusters in continuous percolation* (Preliminary report), 499.

Alexander, Ralph. *A functional with broad applications to metric and convex geometry* (Preliminary report), 132. *Discrepancy of halfspaces*, 427.

Al-Huzali, Abdullah, Jain, S. K. and **Lopez-Permouth, S. R.** *Constructing injective hulls for sums of injectives*, 207. *Rings whose cyclics have finite Goldie dimension*, 207.

Alikakos, Nicholas D. and **Fusco, Giorgio.** *Slow dynamics of spherical fronts for the Cahn-Hilliard equation*, 417. *On the spectrum of the Cahn-Hilliard operator*, 418.

Aliprantis, C. D. and **Burkinshaw, Owen.** *Core equivalence and the overlapping generations model*, 231.

Allen, Beth. *Some aspects of information σ-fields in general equilibrium theory*, 230.

Alligood, Kathleen T. *Accessible rotation number of attractors in crisis*, 379.

Allison, Dean. *Clairaut Lorentzian submersion* (Preliminary report), 137.

Almgren, Frederick J. *Optimal geometries and crystal growth*, 127. *Computing optimal geometries* (Preliminary report), 423.

Almgren, Frederick J. and **Wang, Lihe.** *Mathematical existence of crystal growth with Gibbs-Thomson curvature effects* (Preliminary report), 423.

Almgren, Robert F. *Computation of evolving phase interfaces with Gibbs-Thompson effect*, 126.

Alperin, J. L. *On the topology of conjugacy classes*, 210.

Alspach, Brian and **Chen, C. C.** *Hamilton-connected Cayley graphs on dihedral groups* (Preliminary report), 526.

Alstad, Donald N. See **Loudon, Catherine.**

Aluffi, Paolo and **Cukierman, Fernando.** *Multiplicity of discriminants* (Preliminary report), 458.

Alvarez, Josefina. *The Weyl functional calculus*, 261.

Alzer, H. and **Brenner, Joel L.** *On a double inequality of Schlomilch-Lemonnier*, 389.

Ambasht, Jamuna P. *On nearly open sets in bitopological spaces* (Preliminary report), 143.

Ammann, Robert. *Matching conditions for, and minor modifications of the 2-tile rhomboid set in 3-space*, 428.

Anastassiou, George A., Cottin, Claudia and **Gonska, Heinz H.** *Global smoothness of approximating functions* (Preliminary report), 104.

Anastassiou, George A. and **Yu, Xiang Ming.** *Monotone and probabilistic wavelet approximation* (Preliminary report), 105. *Convex and coconvex-probabilistic wavelet approximation* (Preliminary report), 258. *Convex and coconvex probabilistic wavelet approximation*, 287.

Anco, Stephen C. *New classical supergravity theories-consistency of $N = 1$ supergravity for nonGrassman-valued fields*, 561.

Anderson, Bruce A. *A doubling construction for certain self-orthogonal 2-sequencings* (Preliminary report), 15.

Anderson, D. D. *Lengths of factorization of an element into irreducible elements* (Preliminary report), 450.

Anderson, Greg W. *An explicit proof of Brumer-Stark over $\mathbf{F}_q(T)$* (Preliminary report), 27.

Anderson, Ian M. *The variational bicomplex*, 556.

Anderson, Jack M. *Lie and Jordan multiplications on a commutative semigroup* (Preliminary report), 459.

Anderson, James A., Foryś, Wit and **Head, Tom.** *Retracts and semiretracts of free monoids*, 63.

Anderson, John T. *On an example of Ahern and Rudin*, 245.

Anderson, Marlow, Darnel, M. and **Feil, T.** *A variety of lattice-ordered groups containing all representable covers of the abelian variety*, 24.

Anderson, Michael T. *Hyperbolization and metrics of least curvature on 3-manifolds*, 437.

Anderson, Peter G. *Good Pixel permutations for expensive computer graphics*, 344.

Anderson, T. W. *Goodness-of-fit tests for spectral distributions*, 533.

Andreev, Valentin V. *The analytic Poincaré inequality and trace class operators*, 368.

Andrews, George E. and **Burge, William H.** *Some determinant identities*, 344.

Angelos, James R. See **Cowen, Carl C.**

Anghel, Nicolae. *Extrinsic upper bounds for eigenvalues of Dirac-type operators*, 136.

Anker, Jean-Philippe and **Setti, Alberto G.** *Asymptotic finite propagation speed for heat diffusion on certain Riemannian manifolds*, 436.

Ansari, Ali. *Polynomial control for time delay system*, 178.

Antosik, Piotr. *Composition of distributions of several variables* (Preliminary report), 118.

Anuradha, V. and **Shivaji, Ratnasingham.** *Existence of infinitely many non-trivial bifurcation points*, 322.

Aoki, M. *Interactions of real GNP business cycles in a three country time series model*, 538.

Apostol, Tom M. *Mr. Pythagoras goes to Hollywood*, 179.

Appling, William D. L. *Joint distribution functions*, 196.

Arapura, Donu. *The set of line bundles with nontrivial cohomology*, 462.

Archdeacon, Dan and **Hartsfield, Nora.** *Self-dual embeddings of complete bipartite graphs*, 11.

Argyros, Ioannis. *On the convergence of algorithmic models*, 159.

Arkin, Joseph, Arney, David C., Giordano, Frank R. and **Kolb, Rickey A.** *Stirling relationships* (Preliminary report), 341. *Generalized multinacci numbers combined with generalized Pascal triangles* (Preliminary report), 342. *Triangular numbers and primes* (Preliminary report), 343.

Arkin, Joseph, Arney, David C., Giordano, Frank R., Kolb, Rickey A. and **Smith, Paul.** *Reverse digit constructions of perfect, magic and doubly magic cubes* (Preliminary report), 340.

Armendariz, Efraim P. and **Park, Jae Keol.** *Endomorphism rings of Artinian modules* (Preliminary report), 57.

Arney, David C. See **Arkin, Joseph.**

Arnold, Barry C. *Logistic and semi-logistic processes*, 501.

Arnold, Barry C. and **Groeneveld, Richard A.** *Skewness and Kurtosis orderings: An introduction*, 540.

Arora, Manmohan S. *Modified moment estimation of the parameters of a four-parameter generalized Weibull distribution*, 157.

Arratia, Richard and **Tavaré, S.** *Functional discrete limit theorems for random mappings*, 500.

Arratia, Richard. See **Waterman, Michael S.**

Arriola, Leon. *Generalized linear multistep methods*, 159.

Artino, Ralph A. and **Barros-Neto, Jose.** *Formally hypoelliptic operators*, 97.

Aschbacher, Michael. *Simple connectivity of p-group complexes*, 211.

Ash, C. J., Knight, Julia F. and **Oates, S. E.** *Groups and trees*, 314.

Ash, J. Marshall. *A generalized Cantor-Lebesgue theorem*, 107.

Ashford, Stella Roberson. *Constructing unramified abelian extensions*, 32.

Ashtekar, Abhay. *Gauge and symmetries: Sympletic vs. differential geometry*, 562.

Asmar, Nakhlé H. and **Montgomery-Smith, Stephen J.** *Littlewood-Paley theory on solenoids* (Preliminary report), 310.

Assadi, Amir H. *Permutation complexes and homology representations*, 223.

Assani, Idris. *Uniform return times theorems for dynamical systems and helical transforms* (Preliminary report), 461.

Assmus, E. F., Jr. *Hermitian and Ree unitals and their codes*, 240.

Athanassov, Zhivko S. *Stability of recede trajectories of dynamical systems* (Preliminary report), 88. *Behavior of the integral curves of differential systems near a singular point* (Preliminary report), 363.

Athreya, K. B. *Rates of decay for the survival probability of a mutant gene*, 517.

Avramov, Luchezar L. *Locally complete intersection homomorphisms and Quillen's conjecture on the finiteness of cotangent homology*, 451.

Avramov, Luchezar L. and **Foxby, Hans-Bjørn.** *Cohen-Macaulay properties of local homomorphisms*, 351. *Gorenstein properties of ring homomorphisms*, 453.

Axelrod, David. See **Kuczek, Tom.**

Axelrod, Scott. *Generalized Lagrangian field theory* (Preliminary report), 556.

Axler, Sheldon. *Interpolation by multipliers of the Dirichlet space* (Preliminary report), 214.

Axler, Sheldon and **Gorkin, Pamela.** *Sequences in the maximal ideal space of H^∞*, 358.

Azarian, Mohammad K. *On the near Frattini subgroups of ordinary free products of groups*, 211.

Babb, Brendan J. *Computing Fibonacci numbers rapidly*, 35.

Babuška, I., Elman, H. C. and **Markley, K.** *Parallel implementation of the hp-version of the finite element method on a shared-memory architecture*, 442.

Bachman, Gennady. *On the coefficients of cyclotomic polynomials*, 33.

Baernstein, Albert, II. *Comparison theorems for P.D.E.'s on tori*, 90.

Bagby, Thomas and **Gauthier, Paul M.** *Approximation on thin sets* (Preliminary report), 245.

Bahri, Abbas. *Critical points at infinity in some variational problems*, 414.

Bai, Z. See **Reichel, Lothar.**

Bailey, Donald F. *A Fibonacci congruence*, 345.

Bajaj, Prem N. *On solution of some difference equations* (Preliminary report), 86.

Bakelman, Ilya J. *Hypersurfaces with prescribed mean curvature in Riemannian spaces* (Preliminary report), 465.

Baldwin, Stewart. *Linear patterns of periodic points on dendrites* (Preliminary report), 379.

Ball, Frank. *Aggregated semi-Markov processes as models of ion channel gating mechanisms*, 519.

Ball, Joseph A. and **Clancey, Kevin F.** *Nevanlinna-Pick interpolation on multiply connected domains*, 213.

Ball, Joseph A., Kang, Jeongook, Rodman, Leiba and **Verma, Madanpal S.** *Coprime factorizations with factors having minimal McMillan degree*, 51.

Balmaceda, Jose Maria P. *Multiplicity-free permutation representations of the alternating groups* (Preliminary report), 64.

Baloglou, George and **Tracy, Philip.** *Circular sets* (Preliminary report), 129. *Circular sets*, 392.

Ban, Chunsheng. *Equisingularity of quasi-ordinary singularities*, 456.

Banchoff, Thomas F. *New software for interactive computer graphics in introductory differential geometry*, 264.

Bange, David W., Barkauskas, Anthony E., Host, Linda H. and **Clark, Lane H.** *Efficient domination of the orientations of a graph*, 448. *Efficient dominating sets in oriented trees*, 448.

Bank, Randolph E., Concus, Paul and **Finn, Robert.** *Numerical study of nearly discontinuous behavior of certain capillary surfaces*, 162.

Bankoff, Leon. *A trigono-geometric relationship* (Preliminary report), 370.

Bankston, Paul. *H-Enrichments and their homeomorphism groups.* II, 327.

Barbour, A. D. and **Kafetzaki, Maria.** *Host-parasite distributions and transmission models*, 520.

Barge, Marcy. *Prime and dynamics associated with the Hénon map*, 377.

Barge, Marcy and **Ingram, W. T.** *Inverse limits on* $[0, 1]$ *with logistic bonding maps* (Preliminary report), 375.

Barkauskas, Anthony E. See **Bange, David W.**

Barles, G., Soner, H. Mete and **Souganidis, Panagiotis E.** *Front propogation for reaction diffusion equations*, 414.

Barlow, Jesse L. *Error analysis of update methods for the symmetric eigenvalue problem*, 440.

Barlow, Richard E. and **Spizzichino, Fabio.** *Schur-concave survival functions and survival analysis* (Preliminary report), 500.

Barnard, Roger W. and **Pearce, Kent.** *Sharp bounds on the* H_p *means of the derivative of a convex function for* $p = -1$, 508.

Barnette, D. W. *A short proof of the d-connectedness of d-polytopes*, 132.

Barrett, David E. *Levi-flat hypersurfaces and averaging problems*, 246. *Degeneracy of the pairing between* A^{∞} *and* $A^{-\infty}$, 463.

Barrett, John W. and **Parker, Phillip E.** *Piecewise linear approximations of smooth tensors*, 104.

Barron, E. N., Jensen, R. and **Menaldi, J. L.** *Optimal control and differential games with measures* (Preliminary report), 124.

Barros-Neto, Jose. See **Artino, Ralph A.**

Bartnik, Robert. *Energy and the structure of initial data manifolds*, 560.

Barton, Susan. *Signatures of higher level on a commutative ring*, 40.

Basak, Gopal and **Bhattacharya, Rabi.** *Stability in distribution for a class of singular diffusions*, 227.

Basile, A. See **Shortt, R. M.**

Bass, Hyman. *Noncommutative characteristic polynomials* (Preliminary report), 489.

Bateman, Paul T. *Lower and upper bounds for the number of representations of an integer as a sum of* 5, 6, 7, *or* 8 *squares*, 348.

Bates, Peter W. *Dynamics of the Cahn-Hilliard equation*, 414.

Bator, Elizabeth M. See **Abbott, Catherine.**

Baudisch, Andreas. *Stable actions of periodic abelian groups on abelian groups*, 204.

Baxter, Nancy. *Understanding how students acquire concepts underlying set formation* (Preliminary report), 183.

Beaber, Chrissie, Cheng, Eileen, Hassett, Brendan, Lloyd, Gwen, O'Shea, Donal and **Runnels, Rebecca.** *Exceptional lines and curvature of algebraic surfaces in* C^3 (Preliminary report), 46.

Beals, Richard W. and **Sattinger, David H.** *Poisson structures on* $SL(n, C)$ (Preliminary report), 460. *Scaling invariance and isomonodromy deformations* (Preliminary report), 464.

Bear, H. S., Jr. *Distance decreasing functions*, 74. *Part metric and conformal mapping*, 359.

Beaulieu, Liliane. *Bourbaki for physicists? A glance at some unrealized projects* (1934–1954), 4.

Becker, Joanne Rossi and **Pence, Barbara J.** *Teaching and learning college mathematics: A review of research* (Preliminary report), 182.

Becker, Robert A. and **Boyd, J. H., III.** *Recursive utility: Discrete time theory*, 233.

Becker, Robert A. See **Foias, Ciprian.**

Beckmann, Charlene E. *Student understanding of calculus through computer graphics*, 186.

Bedford, Tim, Fisher, Albert and **Urbanski, Mariusz.** *The scenery flow for hyperbolic Julia sets* (Preliminary report), 243.

Beem, John K. and **Krolak, Andrzej.** *Null geodesics in cosmic censorship* (Preliminary report), 263. *Censorship, null goedesics and strong visibility* (Preliminary report), 561.

Beer, Gerald. *The Attouch-Wets topology: A modification of the Hausdorff metric topology*, 142.

Beerends, Rene J. and **Opdam, Eric M.** *Unification of two types of hypergeometric functions and the related Jacobi polynomials*, 246.

Behr, E. *Remarks on graded and filtered algebras*, 209.

Behzad, Mehdi. See **Alavi, Yousef.**

Bekkali, Mohamed. *Tree algebras* (Preliminary report), 318. *Pseudotree algebras* (Preliminary report), 385. *Chains and anti-chains in interval algebras* (Preliminary report), 504.

Belcastro, Sarah Marie. *Groups with relatively few centralizers*, 66.

Bell, Allen D. and **Farnsteiner, Rolf.** *On the theory of Frobenius extensions and its application to Lie superalgebras*, 209.

Bell, William R. and **Monsell, Brian C.** *Using principal components in time series forcasting of demographic rates*, 533.

Belshoff, Richard G. *Matlis reflexive modules*, 41.

Bengtson, Thomas E. *Helge von Koch* (Preliminary report), 6.

Bennett, Andrew G. *Adding a laboratory component to elementary differential equations*, 277.

Bennett, Andrew G. and **Schroeder, Bernd S. W.** *Generalized maximal functions of Martingales*, 312.

Bennett, Curtis. *Goupoids and buildings*, 241.

Bennett, Frank E. *On resolvable perfect Mendelsohn designs* (Preliminary report), 15.

Bennish, Joseph. *Regularity and asymptotic behavior of mixed initial-boundary value problems*, 97.

Beraha, Sami. *The Tutte integers: Contrasts and transition to analysis* (Preliminary report), 319. *Number theoretic aspects of the Tutte integers.II* (Preliminary report), 386.

Bercovici, Hari and **Voiculescu, Dan.** *Levy-Hincin type theorems for multiplicative and additive free convolution* (Preliminary report), 213.

Bercovici, Hari and **Westwood, Derek.** *The factorization of functions in the polydisc*, 214.

Berenstein, Carlos A. and **Casadio Tarabusi, Enrico.** *Radon and Riesz transforms in real hyperbolic spaces* (Preliminary report), 421.

Bergen, Jeffrey M. *A Galois correspondence for modules over Hopf algebras* (Preliminary report), 208.

Bergen, Jeffrey M. and **Montgomery, S.** *Quotients of crossed products of Hopf algebras* (Preliminary report), 409.

Bergen, Jeffrey M. and **Passman, D. S.** *Delta methods in enveloping rings.* II, 409.

Berger, Stanley A. *Flow in large blood vessels*, 546.

Berhanu, Shiferaw and **Chanillo, Sagun.** *Boundedness of the FBI transform on Sobolev spaces and propagation of singularities*, 417.

Berman, Robert. *Angular limits and infinite asymptotic values of analytic functions of slow growth*, 77.

Bernardis, Ana L. and **Salinas, Oscar M.** *On classes A_p in spaces of homogeneous type*, 391.

Bernau, S. J., Huijsmans, C. B. and **dePagter, B.** *Sums of lattice homomorphisms*, 25.

Berndt, Bruce C. and **Evans, Ronald J.** *Some asymptotic expansions of Ramanujan*, 347.

Berriozabal, Manuel. *The San Antonio pre-freshman engineering program: A mathematics based minority intervention program*, 178.

Bertram, Edward A. *On the number of conjugacy classes in finite groups* (Preliminary report), 241.

Bertrand, Daniel. *A differential analogue of Kummer theory*, 300.

Best, Michael J. *Active set algorithms for isotonic regression*, 476.

Betounes, David E. See **Redfern, Mylan.**

Beyl, F. Rudolf and **Latiolais, M. Paul.** *Distinguishing presentations of metacyclic fundamental groups of 3-manifolds* (Preliminary report), 311.
